(Assistant Professor)

Outline

- Company Brief
- Domain and Technology Stack
  - Sports Data Analytics using Business Intelligence
  - Power BI, Power Query, DAX, Kaggle IPL Dataset
- Work Profile
  - IPL Analytics & Performance Intelligence Dashboard
- Type of Engagement
  - Internship schedule, working hours and project engagement
- Weekly Diary
  - Snapshots of Weekly Diary maintained since the beginning of internship till date
- Documents
  - Project report, dashboard and internship documentation

Company Brief

Karon Infotech
A Surat-based technology and digital solutions company providing web design, development, mobile applications, SEO, digital marketing, creative design and IT consultation.
Karon Infotech – Technology & Digital Solutions
The internship environment provided practical exposure to project development, data analytics and Business Intelligence through the IPL Analytics dashboard.

Karon Infotech Internship
Founded in March 2013 by Satish Patel.

- Provides elite cloud training, consulting, and global certification programs.
- Covers major cloud ecosystems including Karon Infotech – Technology & Digital Solutions, AWS, and Google Cloud.
- The internship training was conducted under the Microsoft–CloudThat Skills for Social Impact initiative.

Internship & Reporting Details

Training Organization
Karon Infotech, Surat

Technology Partner
Microsoft Power BI

Program
Offline Data Analytics Skill-Based Training

Azure Mentor / Resource
Ms. Ritika M. Tilashi

Ms. Stephanie Tamakuwala

Institution
C. K. Pithawala College of Engineering & Technology, Surat

Domain

Sports Data Analytics

The internship project was developed in the domain of sports analytics, focusing on historical IPL match, team, venue and player data to generate meaningful performance insights through Power BI.

What is Sports Data Analytics?

The process of collecting, processing and visualizing sports data to understand match outcomes, team performance, venue patterns and player statistics.

Project Focus

- Analyze historical IPL matches
- Compare team wins and losses
- Analyze batting-first vs chasing outcomes
- Analyze venue-wise scoring and match patterns
- Visualize player performance through interactive dashboards

Technology Stack

Internship Technologies

The project was developed using Business Intelligence and data analytics technologies. Each technology contributed to a specific stage of the IPL Analytics Dashboard.

Power Query

Interactive dashboards, KPIs, charts, tables, maps and report navigation.

Power Query

Data cleaning, transformation, type correction and preparation.

Development Tools

Kaggle IPL datasets were used as the primary data source, while Power Query and Power Query were used for cleaning, modeling and dashboard development.

DAX , SQL, Python

Analytical measures for runs, wickets, averages, strike rate, wins and other KPIs.

Kaggle IPL Dataset

Historical IPL match and delivery data used for analytical reporting.

Work Profile

Internship Work Assigned

The internship involved project-based development of an IPL Analytics and Performance Intelligence Dashboard using historical IPL data, Power Query, Power BI and DAX.

Project Deliverable

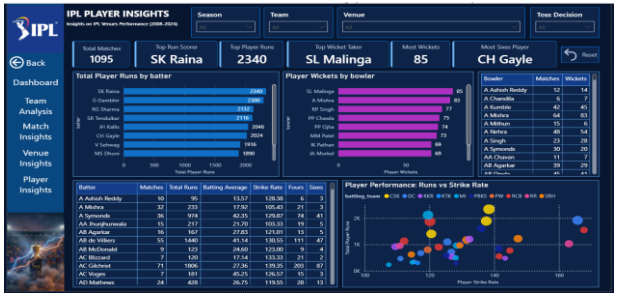

IPL Analytics & Performance Intelligence Dashboard
A Business Intelligence dashboard capable of analyzing IPL matches, team performance, venue patterns, match outcomes and player statistics.

Major Tasks Performed

- Studied and prepared the Kaggle IPL dataset.
- Cleaned and transformed data using Power Query.
- Built the Power BI data model and analytical fields.
- Created DAX measures for cricket KPIs.
- Designed five interactive dashboard pages.
- Tested filters, calculations and visual interactions.

Work Profile

Power BI: IPL Analytics Dashboard

Power BI: Team Analysis Dashboard

Power BI: Match Insights Dashboard

Power BI: Venue Analysis Dashboard

Type of Engagement

Internship Engagement Details

The internship was conducted as a project-based technology engagement focused on Business Intelligence and sports data analytics. The work combined data preparation, Power BI development, DAX analysis, dashboard design, testing and documentation.

Working Schedule

Duration
15 Days
06 July – 22 July 2026

Daily Timing
5 Hours
11:00AM To 4:00PM

Nature of Engagement

- Project-based analytics development
- Power Query data preparation
- DAX and Power BI dashboard development
- Independent development of IPL Analytics Dashboard
- Mentor guidance, testing and documentation

Project Work

Data Analytics & Dashboard Development
75 Hours

Testing & Documentation
12 Hours

Weekly Diary

Phase 1
Requirement understanding, IPL dataset study & project planning

Phase 2
Kaggle data import, inspection and field understanding

Phase 3
Power Query cleaning, transformation and data-type correction

Phase 4
Power BI data model and analytical structure

Phase 5
DAX measures for match, team, venue and player KPIs

Phase 6
Dashboard page development and visual design

Phase 7
Dashboard testing, filter validation and calculation checking

Phase 8
Final dashboard refinement and insight analysis

Phase 9
Final documentation, presentation preparation and project submission

JOINING LETTER

Date: 06/07/2026

To,
Mr. Jeet Patel

Enrollment No: **230090107137**

Program: **Computer Science and Engineering (CSE)**

Institute: **C.K Pithawala College of Engineering & Technology**

Subject: Joining Letter for Internship

Dear **Mr. Jeet Patel,**
We are pleased to confirm your joining as an **IT Intern - Website Development In Python at Karon Infotech.**

Your internship commences on **06/07/2026** and will be for a total duration of **15 Days,** ending on **22/07/2026, subject to satisfactory attendance and performance.**

We welcome you to Karon Infotech and wish you a successful and rewarding internship.
